## Pathology - Secure Messaging

Our secure messaging is used by labs that already have a LIS (Laboratory Information System) such as: Kestral, Medipath, Auslab, or Delphic. We receive the HL7 results output by the LIS and then send them through the Medical-Objects network to over 25,000 health professionals.

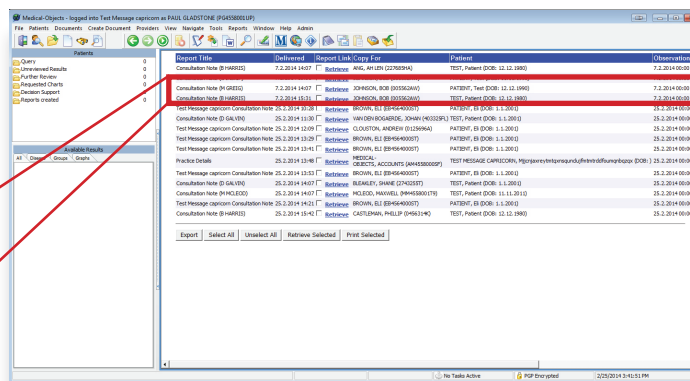

Australia's Fastest Secure Messaging

### What are the benefits of our secure messaging?

- All results are securely encrypted and SMD compliant.
- All results are delivered via the fastest secure messaging system in Australia.
- View audit logs to confirm delivery and when imported by the referrer's software.
- Online Results Web Portal (Optional).
- Free Installation and support for referrers is included.
- Capable of sending images directly to referrers.
- All results are backed up for peace of mind.
- Complies with NATA testing and Australian Standards (AS4700.2 Pathology Order and Results)
- Forward or re-send results with ease.
- Reduced delivery costs, and reliable infrastructure.

At the click of a button you can access a real time delivery report, detailing whether your results have been delivered or even imported by your referrer's practice software.

Report Title	Delivered	Report Link	Copy For	Patient	Observation Date	Delivery Type	Result status	Application ACK
Consultation Note (G INSKIP)	5.2.2014 11:09	<input type="checkbox"/> <a href="#">Retrieve</a>	JOHNSON, BOB (005562AW)	PATIENT, Test (DOB: 11.11.1990)	7.2.2014 00:00	CAPRICORNCM	Final result	Genie v8.59 @ 5.2.2014 11:11

## Pathology - Secure Messaging

### What's Included?

#### Pathology Explorer

A useful tool to access and re-send previously sent results and view delivery status of results.

#### Unlimited Support for Referrers

Our helpdesk operates from Mon-Fri 9am-5pm (AEST) and is backed by our helpful and experienced support team.

#### Fully Hosted Infrastructure

The Medical-Objects hosted solution is part of our private cloud hosted in a state of the art industry leading Data Center located here in Australia.

#### Relay Client

Facilitates the transmission of results output by your Laboratory Information System (LIS) to over 25,000 connected health professionals.

### Optional Extras

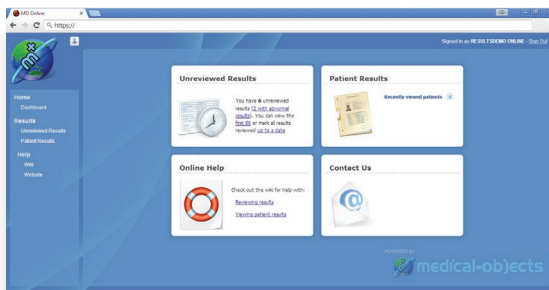

#### Image Sending

Medical-Objects have a range of options available for sending pathology images to your referrers.

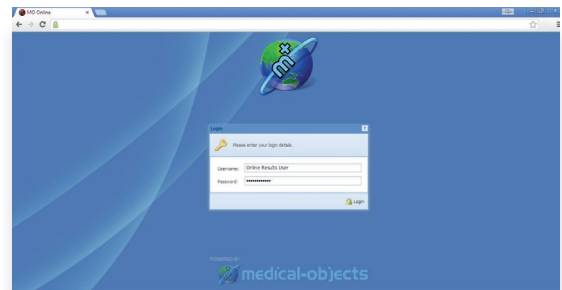

#### Online Results Web Portal

The Online Results Web Portal is a simple but secure means of providing access to results for your mobile referrers. The solution is accessed via web browser, and also available on mobile devices; therefore ideal for referrers located in public or private hospitals.
