Radiology Secure Messaging

✔ Real-time Report Delivery

✔ Real-time Report Tracking

✔ Real-time Image Delivery

✔ Free for your Referrers

✔ Encrypted and Safe

✔ 5 Star Rated Support

Medical-Objects provide Australia's fastest Secure Messaging to over 67,000 health providers Australia wide. Our system facilitates the instant real-time delivery of encrypted reports directly into your referrer's practice software. The Medical-Objects messaging solution can be set up quickly and easily to integrate with all of the major Radiology Information Systems (RIS). Reduce your delivery costs whilst providing fast, efficient delivery of your reports and images in seconds.

Radiology Secure Messaging

Send Reports
Our solution is built on the latest real-time, point to point technology, meaning your reports are sent directly to the recipient within seconds.

Delivery Report

We provide you with software to instantly track the status of all reports sent. The delivery report allows you to view when reports were received as well as when imported by the recipient's practice software.

Image Delivery

In addition to electronic reports, Medical-Objects also have a range of options for supplying images or hyperlinks in your reports to your referrers. Medical-Objects can work in conjunction with a number of popular RIS/PACS systems using our own technology, or alternatively, you can utilise the services of one of our image partners.

5 Star Rated Support

At Medical-Objects we are dedicated to providing the best service and support in the industry. Our highly rated support is reflected by the 5 star ratings we constantly receive from our customer base. See over 2900 of the latest reviews from our customers at: www.medical-objects.com.au/feedback

Free for Referrers

Medical-Objects is completely free for your referrers to receive your reports. Let us handle the installation, configuration and ongoing support of your referrer practices.

Easy Transfer

We have a tried and tested approach to migrating from an existing messaging system to the Medical-Objects solution.

RIS Integration

Medical-Objects have integrated with all of the major Radiology Information Systems (RIS) such as Comrad, Contrast, Karisma, Occam, Voyager, and many more. We can integrate with any RIS system capable of producing HL7 or PIT format reports.

Security

All results are protected with high level encryption and security. When using Medical-Objects you can be assured that your results are safe.
