

Specialist

Real-time Health Information Exchange

Medical-Objects secure messaging for Specialists enables your practice to send letters and automatically download correspondence. You can send consult letters directly from your practice software, or from Microsoft Word to other health providers, or even send more complex reports in PDF format. Medical-Objects have integrated with the majority of Specialist software vendors so you can receive referrals and other correspondence directly into your practice software.

Open your business to the Medical-Objects network and link to more providers. When you join Medical-Objects you are automatically added to the provider directory. Not only do you get access to the directory, you also get the benefits of being promoted to **over 60,000** health providers Australia wide.

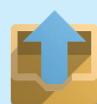

Delivery Report

At the click of a button, you can track all correspondence sent or received via the Medical-Objects Delivery Report.

Send Reports

Our real-time solution allows you to send reports directly from your practice software or Microsoft Word.

Save Money

Specialists need only send 7 Letters per week using Medical-Objects to break even and have the software pay for itself.

Send PDFs

You can send PDF documents to recipients in seconds. This is ideal for reports containing graphs, charts and diagrams.

Save Time

No more scanning or faxing! All correspondence received will import directly into your practice software.

Integration

The download client can integrate with most specialist practice software. If you have no practice software, we can output incoming correspondence as PDF.

Provider Directory

Being listed on our provider directory promotes your business to **over 60,000** health professionals Australia-wide.

Security

All results are protected with high level encryption and security. You can be assured that your results are safe.

What's Included? (Sending Plan)
